

# SHIN THANT LWIN

frontend developer

I'm Shin Thant Lwin, I have been working as a frontend developer for the past years with a focus on React.js and Next.js. I specialize in building dynamic and performant web applications that delight users. From component-based architecture to server-side rendering, I'm passionate about leveraging the power of React and Next to create seamless digital experiences.

## EXPERIENCES

### Frontend Developer

2023 – 2024

### Circles X, Yangon Myanmar

In the last six months at CirclesX, I've been building user-friendly websites using React, and Next Js. I work closely with designers to create seamless experiences for our users. It's been a great learning experience in a supportive team environment.

### UI / UX Instructor

2021 – 2022

### Study Online Myanmar(SOM)

I've enjoyed sharing my expertise with eager learners, guiding them in understanding design principles and user-centered thinking. It's been a rewarding experience contributing to the growth of aspiring designers while enhancing my own skills along the way, volunteering as a UI/UX instructor at SOM

### SWD Workshop

2022 – 2023

### MMS One Stop IT Solutions(MMSIT)

During my time at MMSIT, I engaged in workshops involving teamwork on over three projects. These experiences enhanced my collaboration skills, technical proficiency, and understanding of project dynamics.

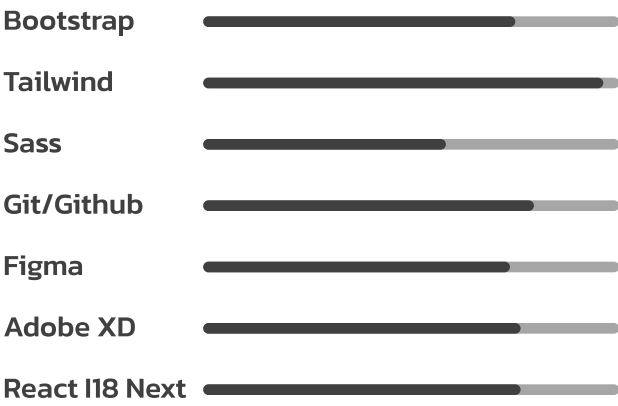

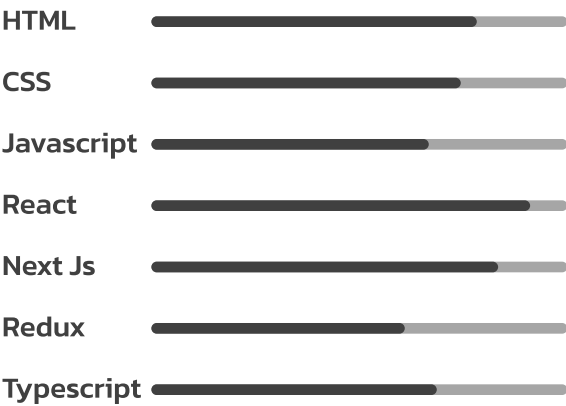

### Creating Together

2022 – 2023

### Collaborating With A UI/UX Designer On A Project

In this collaborative endeavor, I had the privilege of working alongside friends and a skilled UI/UX designer on a project. Our combined efforts brought forth a dynamic synergy, blending technical prowess with creative design sensibilities. Through open communication and shared vision, we navigated challenges, refined ideas, and transformed concepts into reality

## SKILLS

## CERTIFICATIONS

### Special Web Design(SWD)

2022 – 2023

### MMS One Stop IT Solutions(MMSIT)

MMSIT's Frontend Development certification program offers a comprehensive curriculum covering HTML, CSS, JavaScript, and React, ensuring students are well-prepared for employment in frontend development roles. With a focus on practical skills and real-world projects, students acquire the expertise needed to succeed in the industry upon completion of the program.

### React JS

2022 – 2023

### Compass

Compass's Advanced ReactJS course delves deep into advanced concepts like state management, component patterns, and performance optimization. Students emerge proficient in leveraging React for complex projects, ready to excel in frontend development roles.

### UI/UX Design

2021 – 2022

### Binary Digital Toolbox

During my time at MMSIT, I engaged in workshops involving teamwork on over three projects. These experiences enhanced my collaboration skills, technical proficiency, and understanding of project dynamics.
